

# UltraHP™

HIGH PROFILE RIDGE CAP SHINGLES

*Take quality to another dimension with  
IKO UltraHP™ Ridge Cap Shingles...*

When you've just built a roof with IKO premium shingles, there's only one way you can top its long-lasting good looks – with **IKO UltraHP™** High Profile Ridge Cap Shingles!

Our new, specially constructed ridge cap shingles are designed to provide a high-quality alternative to using cut-up shingles to protect this important area.

The "HP" stands for "High Profile", which means that they're also designed to enhance the architectural shake-like appearance and dimensional profile of our premium architectural fiberglass shingles.

Beautiful protection against the elements – and easy to install, too!

- Dramatic high-profile design adds dimension, depth and texture
- Enhance your home's aesthetic appeal by accentuating the roof-line and rakes
- Multi-layer construction for durability and superior tear strength values
- Extra performance of IKO-SBS Asphalt Coating
- Self-sealing adhesive backing for easy installation and maximum wind protection
- Pre-formed rolled design features a curved edge and has an 8-1/4" exposure – no need to cut or fold on the roof

- Because there are fewer pieces to install than with traditional hip and ridge products, there's less labor involved

How much do you need?

An average 2500 sq. ft. home requires approximately 70 linear feet of IKO **UltraHP™** High Profile Ridge Cap Shingles.\* To determine how much you need, measure the roof's ridges, hips and dormers.

- Each box covers approx. 20 linear feet
- For 100 linear feet of coverage, approx. 5 boxes will be required
- Available in 10" width (approx. 50 lb/box)

\*If you wish to add along rake, please include measurement in calculation.

Take quality to another dimension on your next roofing project!

Available in colors that match our most popular Cambridge & Royal Estate Architectural shingles!
